Our Mission

To maintain our position as the oldest and best leading supplier of ready mix concrete in the markets in both Makkah and Taif, and to expand our work to be a part of the new ambitious mega projects in the western region that are a part of Saudi Arabia's Vision 2030.

Our Vision

To become the foremost company in ready mix concrete in the western region of Saudi Arabia and be a part of and accelerate the growth of the Kingdom leading up to Vision 2030.

Overview

Al Jazera Concrete Company - JCC - has been supplying Makkah and Taif with concrete since 1980. Over the course of more than 40 years in the business we have served some of the biggest companies in Saudi Arabia with projects worth billions of riyals.

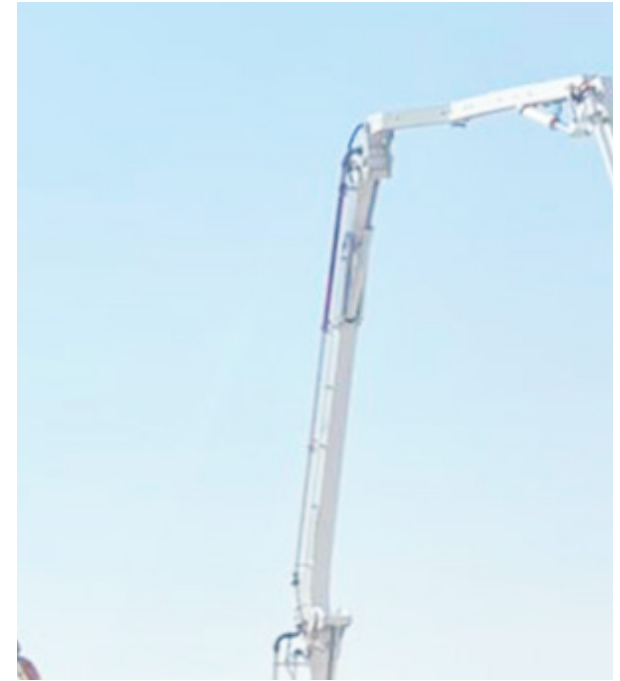

Our factories are certified by **ISO's 9001 Quality Management for the supply and delivery of concrete** [\[1\]](#), attesting to the high quality we offer our clients. Our facilities are all constantly maintained and monitored by experienced engineers and technicians who work around the clock to provide high quality concrete to our clients.

Quality

Al Jazera Concrete Company's top priority is our client's satisfaction and as such one of the most important and core constituents of our success has been our focus on using quality materials.

Our materials are tested and processed during every stage of the production cycle and constantly provide the required strength within the first two weeks of pouring.

Equipment

- More than 60 Concrete Mixers with capacities varying from 8 to 12 cubic meters
- 25 Concrete Pumps of boom lengths from 32 meters all the way to 62 meters
- 8 fully automated batching plants with accompanying ice plants capable of producing 120 cubic meters of concrete per hour

Safety

It is important for us to make sure to keep our employees safe so that they can continue to provide you with great quality concrete. To that end JCC staff are required to take an **OSHA certified program** [\[2\]](#) on safe practices in Concrete and Masonry Construction to educate our workforce on how to minimize near misses and eliminate work place safety incidents.

Sustainability

We get it, concrete can be a taxing industry on the environment at all stages of production. That's why we use air filters and recycle our cleaning water on site. We also use a concrete material reclaimer so that no materials go to waste. Eventually as the world goes green, we hope to keep up and transition to using the latest environmentally sustainable green practices.
